

Brabender Loss-in-Weight Feeder Type DDW-MD2[3]-DVT45-15[30]

The Brabender Loss-in-Weight Feeder Type DDW-MD2[3]-DVT45-15[30] is a special gravimetric metering feeder featuring a vibrating tray module for pellets and free flowing granular bulk ingredients.

The weigh-feeder consists of a free-standing mounting base/weighing module combination with digital load cell DigiMASS-2, a base-mounted rack with an integral storage hopper module and a vibrating tray module mounted in the rack.

The tray is vibrated by an electromagnetic vibration drive featuring a vibration amplitude feedback system, which ensures linear conveyance characteristics over the entire feed rate range. All modules are fully mounted and wired to junction boxes. Combined with a controller from the Congrav®

line or the Brabender SCC Field Bus System they form a high-tech feed system for highest feeding accuracy. All parts in touch with the ingredient are made of stainless steel.

Mild steel parts are painted light grey as per RAL 7035 (textured coating). The unit conforms to CE directives.

Weight with 15 dm³ hopper approx. 30 kg, with 30 dm³ hopper approx. 33 kg

Technical Data*

Base / Weighing Module

Mounting base/weighing module combination type MD2 or MD3 (depending on bulk density, feed rate and storage requirement):

- Free-standing mounting base with vibration isolation pads
- Digital load cell DigiMASS-2 with two vibrating wires according to the principle of weight detection by comparison of masses
- Junction boxes

Weighing ranges:

- Version with 15 dm³ hopper:
 - 16 kg net (MD2)
 - 16 kg net (MD3)
- Version with 30 dm³ hopper:
 - 13 kg net (MD2)
 - 28 kg net (MD3)

Feed Module

Vibrating tray module DVT45:

- Tray width 45 mm
- Tray cover included as standard
- Ingredient-touched parts SS 1.4301 (≈ AISI 304)
- Electromagnetic vibration drive
 - Diode voltage 157 V
 - Frequency 50 Hz
 - Enclosure protection IP 65
 - Vibration amplitude feedback

- Max. feed rate 450 dm³/hr*
- Turndown ratio 25:1

* Feed rate at 90% of max. vibration drive capacity (reserve capacity required for regulation in gravimetric metering already taken into consideration).
Feed rate data refer to the following reference medium: plastic pellets, free flowing, bulk density 0.5 kg/dm³, grain size 4 mm

Rack / Hopper Modules

- Conical hopper module as an integral part of the rack in which the feed module is mounted
- Cover module with inlet pipe and vent pipe for automatic refilling
- Ingredient-touched parts SS 1.4301 (≈ AISI 304)

Hopper volumes:

- 15 dm³
 - 30 dm³
- (suited to feed rate range)

Accessories / Options

- Flexible connection sleeves
- Dust filter cartridge for vent pipe
- Laid-on cover module with handle for manual refilling
- Safety grid, SS 1.4301 (≈ AISI 304)

Special Designs

- Pressure-tight design
- Pressure compensation on inlet pipe
- Pressure compensation on outlet pipe
- Explosion-proof design
- Version for SCC Field Bus System

Control Modules

Congrav[®] controller and vibration amplitude controller for control cabinet mounting or Congrav[®] operating unit and feeder-mounted control and vibration control modules "ISC" for Brabender SCC Field Bus System
