Screw Feeder
DSR28 2.0 (DC-Smart)
Volumetric and Gravimetric

General Information

The DSR28 is a feeder ideal for poor or difficult flowing bulk ingredients at low feed rates. The feeder has the following main components: a stainless steel screw trough, an agitator in the screw trough, a screw, a screw tube, a DC smart motor and an extension hopper with a volume of 5 dm³ (0.18 cuft), 10 dm³ (0.35 cuft) or 20 dm³ (0.71 cuft), low mounting height. The smart motor is characterised by an extremely high adjustment range of 1:100.

The horizontal agitator works to consistently fill the screw and prevents hopper bridging while providing mass flow. This results in optimal feeder accuracy and control.

The DSR28 is easily disassembled for wet or dry cleaning by releasing three quick release clamps from the gear motor assembly. All service is from the front or rear.

The gravimetric version includes the weighing systems MD2 and MD3 featuring a high-resolution digital load cell with serial data transmission as well as MS2 and MS3, with strain gauge load cell with advanced filtering technology.

The unit conforms to CE directives.

Control Modules

Control and speed modules are offered either mounted onto the feeder (Congrav® CM-E) or are available for mounting in a separate control panel (Congrav® CB-E or Congrav® CB-S).

Controls can communicate directly to most host/PLC systems or to Brabender Technologie Congrav® Operator Interfaces.

* Theoretical values at 100% screw filling level and motor speed. Depending on the flow characteristics the screw filling level may decrease to 50%. Further limitations must be considered for gravimetric feeding as max. speed should be reduced to allow for bulk density variations. The values in brackets refer to optional motors.

**Options and Accessories**

- Flexible **inlet and vent connections**
- Flexible **outlet connections**
- Interchangeable screws and screw tubes
- **DESTACO clamp fasteners** with safety switch
- Versions for higher or lower temperatures
- Vertical outlet with **quick release**
- Maintenance disconnect box
- **Filter bag** or **JetFilter** for vent pipe
- Inertia base, turntable or **cart mounting**
- **Pressure compensation for the outlet** Cleaning and refill systems upon request
